Matki Synchronised Movement System
 Matki Designers have perfected the technology required to achieve the fluid, accurate movement of doors carried on independent arms. The unique, anti-judder 'Arm-Lock' device forces the carrying arms to act in tandem as the clever 'Glidepath' tracking mechanism steers the door effortlessly backwards and forwards. Matki - combining engineering excellence with elegance and style.

Door Opening Movement

- Anti-judder 'Arm Lock' device
- Carrying arms swing in tandem
- 'Glidepath' tracking mechanism

Note: Please ensure that door has sufficient room to swing into the shower area without obstruction.

Handle options for inswing doors

Anodised aluminium bar with chrome finished corners.

Solid glass handle.
