Fittings for contemporary kitchens.

COMFORT AND PERFECTION

GROHE

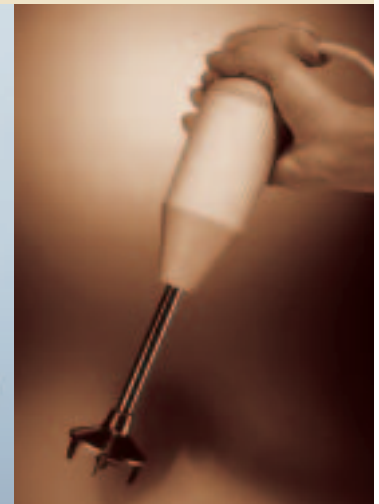

More reach, less effort Zedra

Zedra provides impressive proof that simplicity is central to good technical solutions. Its smartly designed lever puts optimum regulation of water flow and temperature at your fingertips.

That's not all. Other practical features of Zedra include: 360° swivel action, and an extractable rinsing spray or aerator with a maximum reach of 1.5 metres in all directions. After selecting the rinsing spray setting, Zedra automatically reverts to the aerator setting as soon as you've finished. Zedra, in short, is a pleasure to work with.

Ingeniously, the version with pull-out rinsing spray is fitted with "SpeedClean", an anti-limescale system which eliminates scale-congested spray jets. So if we at GROHE think of our Zedra as the perfect marriage of innovative technology and user comfort, we reckon you'll be inclined to agree.

Turns kitchen chores into child's play Europlus

You will be more than impressed by our Europlus sink mixers. The swivel spout comes with an extra-large radius, providing sufficient reach to take the hassle out of many kitchen chores.

For even more flexibility, Europlus is available with pull-out rinsing spray. Scale, incidentally, is no problem here - thanks to GROHE's SpeedClean anti-limescale system. All Europlus models come with ceramic disk technology and an ergonomically shaped lever for easy operation. A perfect solution, whatever the requirements - that's Europlus!

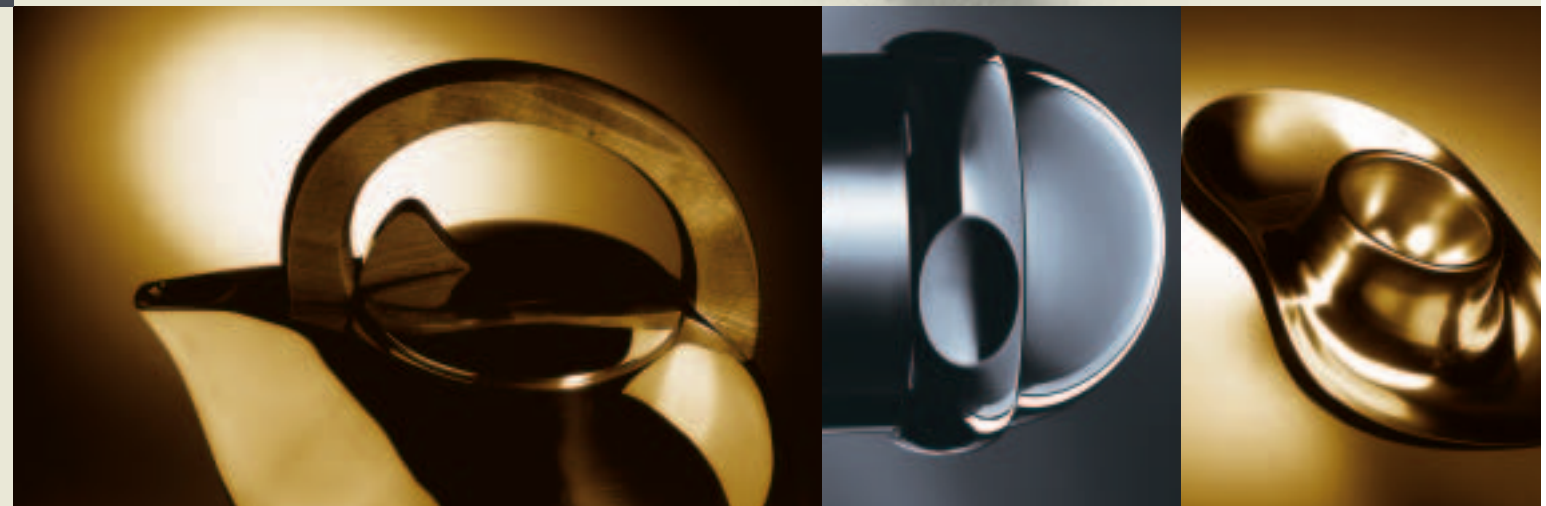

Clear form, precision technology **Eurodisc**

Clear, smooth contours and elegant forms make our Eurodisc an eye-catching, yet stylish fixture in any kitchen. Naturally, Eurodisc has the practical credentials to match; a lever so light to the touch, you can operate it with only two fingers; or a swivel spout that makes light work of many chores at the sink.

Innovation all round **Sentosa**

Sentosa is a line of two-handle sink mixers which combine modern elegance with high-tech innovation. Technologically, Sentosa is built around Carbodur-coated ceramic discs. A diamond-like carbon substance, Carbodur renders Sentosa's mechanical parts virtually immune to wear and tear. The result: smooth, easy handle action, even after years of use.

Refined steel, superior convenience

Alira

Alira's clear lines radiate a sense of reliability and superior functionality further enhanced by its high-tech surface finish. Its swivel spout and the pull-out spray give you exactly the kind of flexibility you look for in a modern kitchen fitting. The pullout spray, in particular, brings water to where you need it on your sink.

Alira puts the choice between the spray function and the aerator function literally at your fingertips. To prevent unintentional splashing, the mechanism will automatically switch back to the aerator setting as soon as the tap is closed. Temperature control is greatly facilitated by the light-action lever. Choose Alira to lend a timeless touch to your kitchen.

Refreshing design, practical benefits
Minta

The Minta kitchen mixer comes in a classical chrome finish, and with a choice of practical swivel spout or pull-out rinsing spray. Built round ceramic cartridge technology, it is designed to look great and work perfectly for years to come.

The Minta kitchen mixer brings stylishly modern flair and hands-on benefits to work at the kitchen sink. Clear contours and a reductive form makes Minta intriguing, and eye-catching, while various convenient features provide real practical benefits. The arched spout, for example, means even the largest pots can be easily positioned for filling.

Concentrate on the essentials

Atrio

Choosing stylish accessories are the best ingredients for creating a contemporary kitchen. Engineered for functional excellence, Atrio will add a highly individual touch to what may well become your favourite room in the house. Its exterior design features are reduced to the essentials, radiating a feeling of extravagant lightness. Whatever fads and fashions the future may bring, the timeless appeal of this kitchen fitting is sure to endure. Atrio's functions are on par with its sophisticated form. Equipped with an aerator and a swivel stop, the spout is designed both for convenience and safety. Longevity is ensured by maintenance-free, easy-action Carbodur® ceramic discs on the inside, while the beautiful chrome surface of this kitchen fitting is specially finished to sparkle like new even after years of use.

Timeless design, durability to match

Eurostyle

A marriage of timeless forms and supreme durability, the Eurostyle combines sparse geometric figures with finely balanced contours to create an exciting slimline silhouette. The fact that Eurostyle is engineered for an extended life can be seen from the high-quality ceramic discs installed inside. Eurostyle looks the part too, sporting a solid metal level and a durable, easy-to-clean finish. Eurostyle is available with a normal or an extra-tall swivel spout to make work in the kitchen effortless and enjoyable.

Everything modern kitchens need **Eurosmart**

Eurosmart has everything a good sink mixer needs. Durability and supremely easy lever action, thanks to legendary GROHE technology. Plus a perfectly positioned spout for easy filling. Eurosmart's outer surfaces are finished with a special scale-inhibiting agent making them virtually immune to wear and tear.

With its clear contours and straightforward design, our Eurosmart lives up to its name in any contemporary kitchen.
